Summary

An enthusiastic IT undergraduate and aspiring Software Engineer focused on **Full Stack Development**, driven to build scalable, user-centric applications. Hands-on experience in end-to-end projects and applying **AI/ML and data science** concepts—including NLP, data cleaning, preprocessing, EDA, and data visualization—to extract actionable insights, supported by a strong foundation in core computer science concepts.

Skills

Programming Languages: C++, Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite

Backend: Node.js, Express.js, Flask, REST APIs

Database: MongoDB, MySQL

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Streamlit, Odoo ERP

Education

B.TECH Information Technology

CMR University, Bangalore

Graduating: 2027

CGPA: 9.19 / 10

Experience and Projects

Narrative Nexus – Dynamic Text Analysis Platform

November 2025 – January 2026

Virtual Infosys Springboard Internship (Remote)

Tools Used: Python, NLP, Streamlit, scikit-learn

- Developed **Narrative Nexus**, an NLP-based platform to analyze unstructured text and extract key themes, sentiments, and actionable insights.
- Performed text preprocessing including cleaning, tokenization, stop-word removal, stemming, and lemmatization.
- Implemented topic modeling using Latent Dirichlet Allocation (LDA) to uncover hidden themes in large text datasets.
- Integrated sentiment analysis to classify text into positive, negative, and neutral categories.
- Applied extractive and abstractive summarization techniques to generate concise insights.
- Built an interactive Streamlit dashboard with word clouds, sentiment charts, and topic visualizations.
- **Objectives:**
 1. Extract key themes and hidden topics from unstructured text data.
 2. Analyze sentiment trends to understand emotional patterns in content.
 3. Generate actionable insights and recommendations based on analysis.
 4. Provide interactive visualizations to support data-driven decision-making.

EDA Tool Project

April – 2026

Personal Project

Tools Used: Python, Flask, Pandas, Matplotlib, Seaborn, ReportLab

- **EXPLORATORY DATA ANALYSIS TOOL**
- Developed a web-based EDA tool using Flask for automated data analysis and visualization
- Implemented file upload functionality supporting CSV and Excel formats with secure handling
- Generated interactive plots including histograms, box plots, and correlation matrices using Matplotlib and Seaborn
- Created PDF report generation with data summaries, statistics, and embedded charts using ReportLab
- Gained hands-on experience with data preprocessing, statistical analysis, and web application development

Bluzee IT Consultants Pvt. Ltd.

May 2026 – June 2026

ERP Fundamentals (Odoo) Internship

Tools Used: Odoo ERP

- Configured and managed users, companies, products, and inventory workflows within Odoo ERP.
- Implemented CRM pipelines, lead management, and sales process automation.
- Executed end-to-end sales and purchase workflows including quotations, invoicing, delivery validation, and payment processing.
- Worked with inventory management, inter-company transactions, and order lifecycle automation.
- Gained hands-on experience with enterprise software architecture and business process automation.

Certifications

- **Python for Data Science – IBM (2024):** Learned Python programming, data analysis, and data visualization for data science applications.
- **Green Skills and Artificial Intelligence under Skills4Future Program – Edunet Foundation (October 2025–February 2026):** Gained knowledge of AI fundamentals, sustainability concepts, and industry-oriented green technology practices.
- **Deloitte Data Analytics Job Simulation – Forage (June 2026):** Completed practical tasks in data analysis, business problem-solving, and forensic technology through real-world simulations.
